WEB ACTIVITY REPORT

Name: Sri Chandhra Sai Lakshimi
Roll No: 26000124
Section: CSE - 2

Introduction

This report presents two web development activities completed as part of the web activity work. Activity 1 demonstrates a college information website for NRI University. Activity 2 demonstrates a student academic dashboard that organizes student details, attendance, results, subjects, exam schedules, and announcements. The screenshots below show the main sections of each website.

ACTIVITY 1: NRI UNIVERSITY WEBSITE

Objective

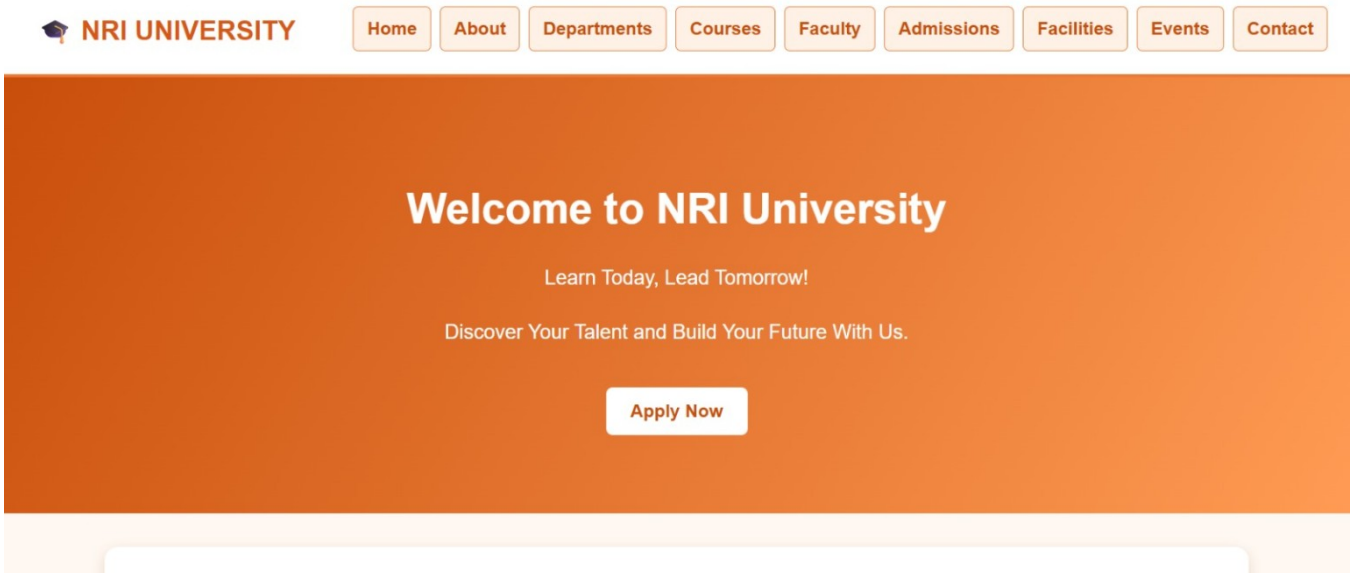

To create a college information website that presents important details about the university in a clear, attractive, and easy-to-navigate layout. The navigation bar helps visitors move between the main sections.

Explanation

The homepage introduces NRI University with a welcome message, tagline, and an Apply Now button. The About section gives a short description of the college. The Departments section displays programmes such as CSE, CSM, ECE, and EEE, while the Courses section lists B.Tech, M.Tech, and MBA. The Faculty section highlights experienced teachers, academic mentors, and technical trainers. The Admission Procedure section shows the basic steps for applying. Campus Facilities lists the library, computer labs, sports, and transport. College Events presents cultural, technical, and sports events. The Contact section provides the college name and location, and the footer closes the page with the university identity and tagline.

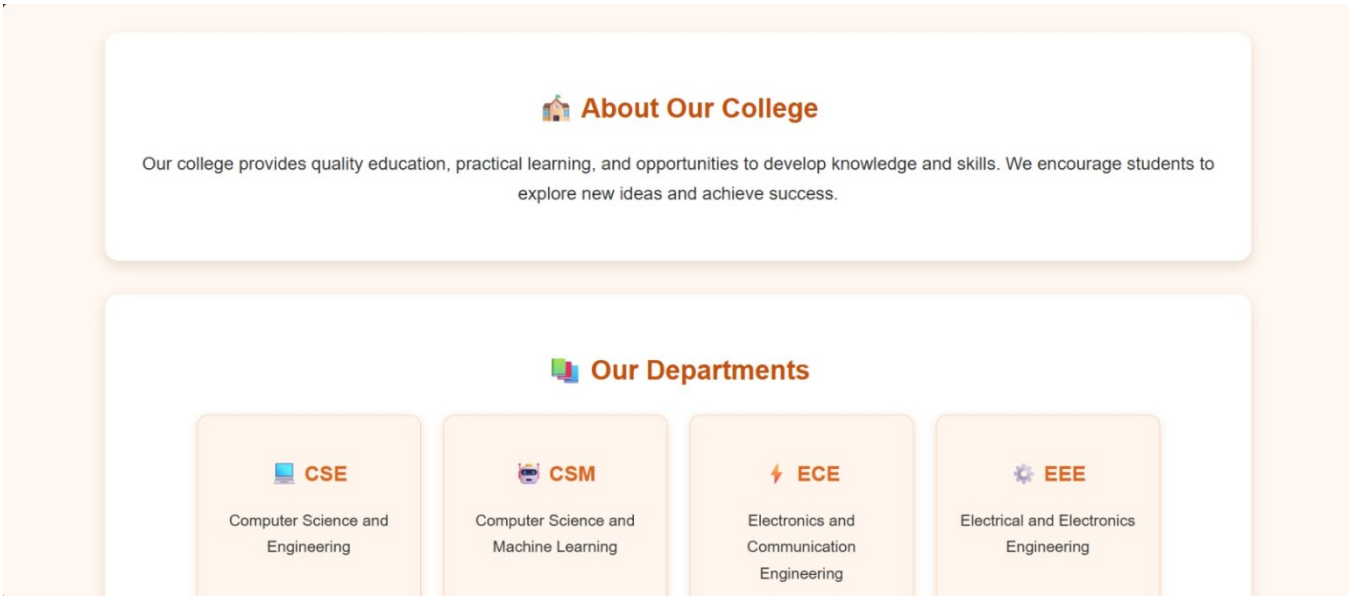

Screenshots and section-wise explanation

Screenshot 1: Homepage and navigation bar

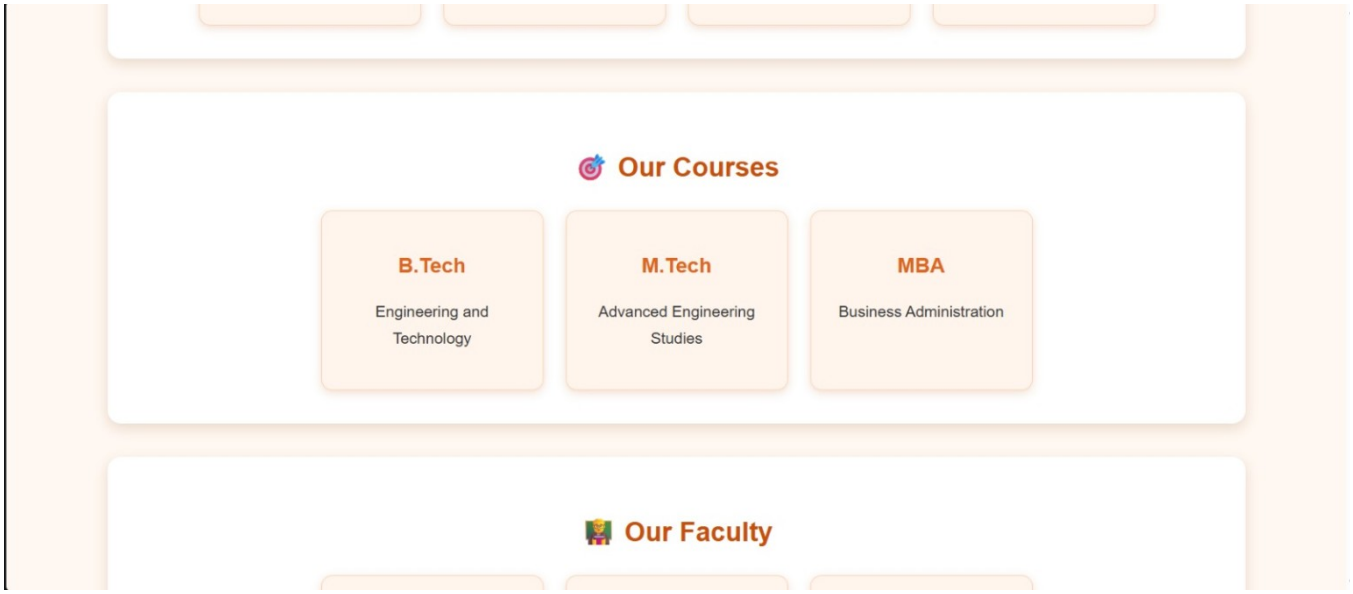

The header contains the university name and navigation links such as Home, About, Departments, Courses, Faculty, Admissions, Facilities, Events, and Contact. The hero section welcomes visitors and provides an Apply Now call-to-action.

Screenshot 2: About Our College and Departments

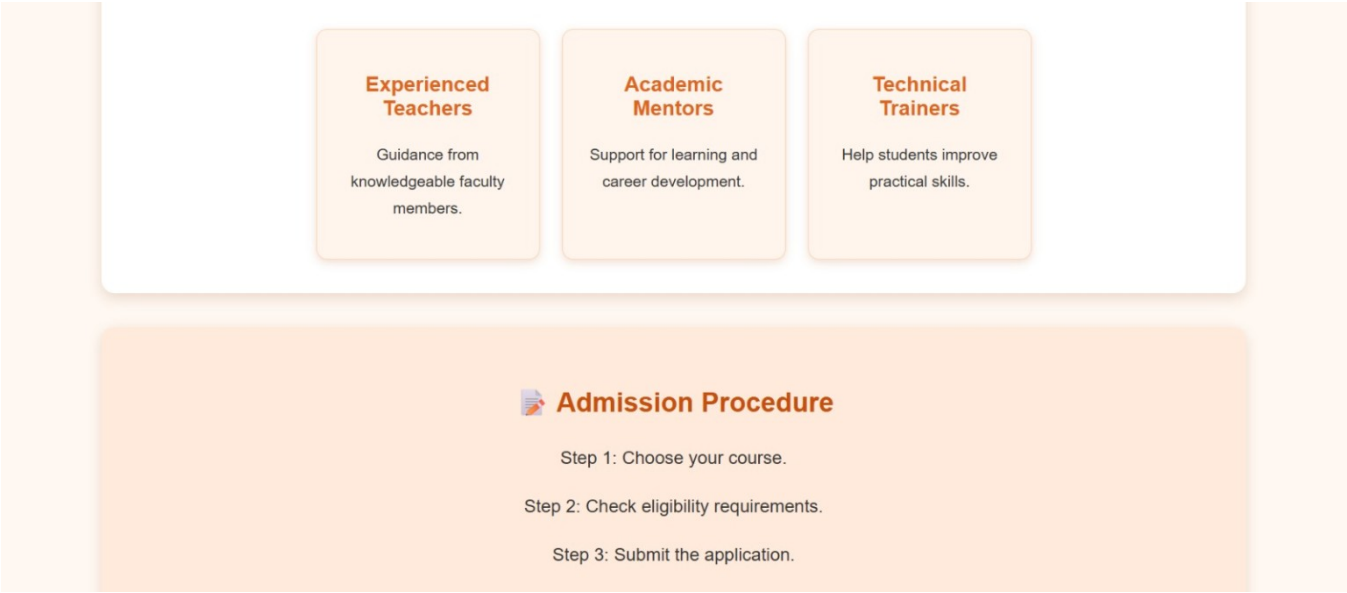

The About section briefly explains the college's learning focus. Department cards show the available engineering streams, helping visitors identify the areas of study.

Screenshot 3: Courses and Faculty

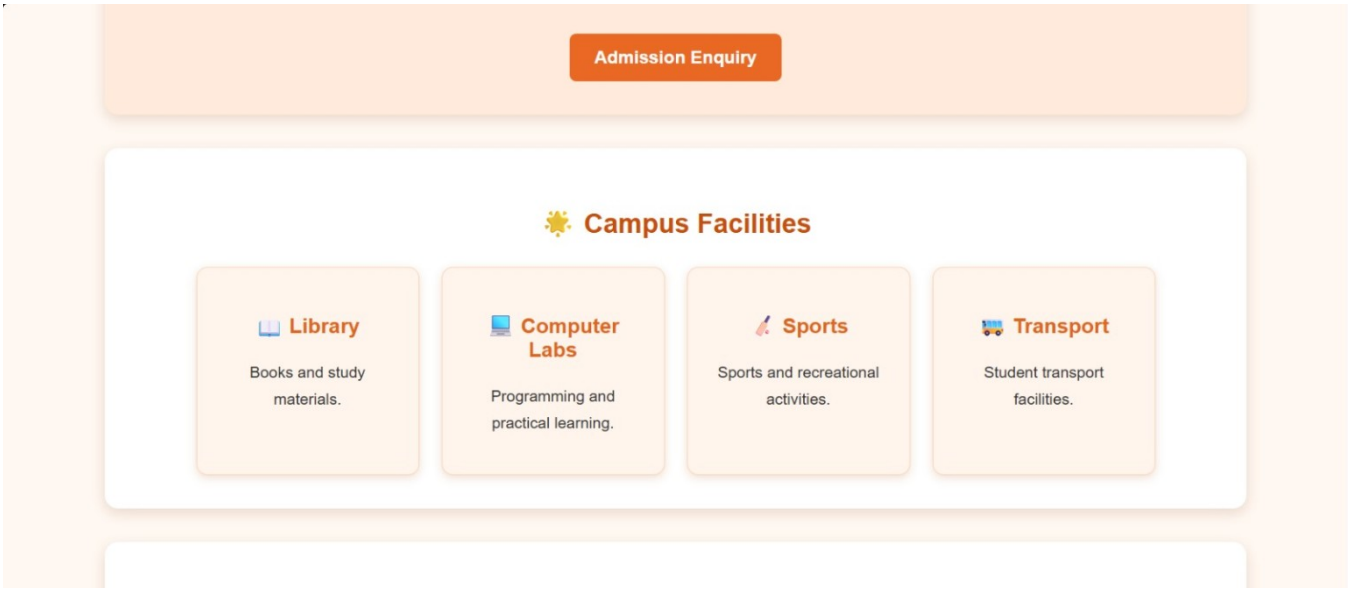

The Courses section presents B.Tech, M.Tech, and MBA. The Faculty section introduces different kinds of academic support, including experienced teachers, mentors, and technical trainers.

Screenshot 4: Faculty and Admission Procedure

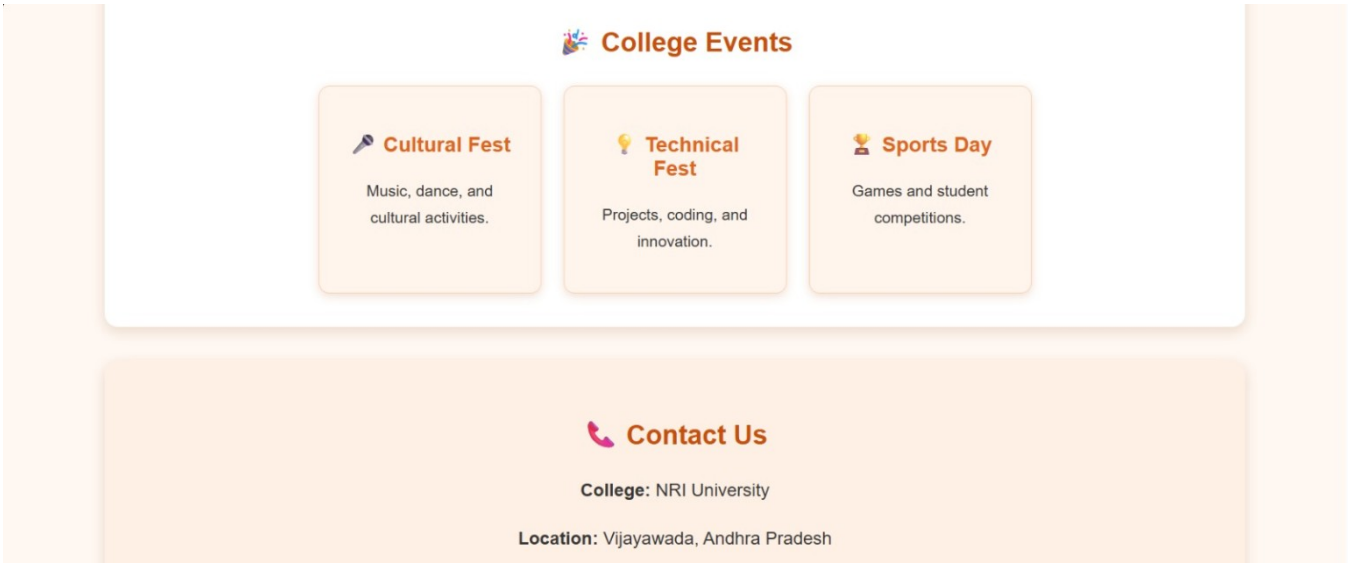

Faculty cards describe teaching and mentoring support. The admission section presents a simple sequence: choose a course, check eligibility, and submit the application.

Screenshot 5: Campus Facilities

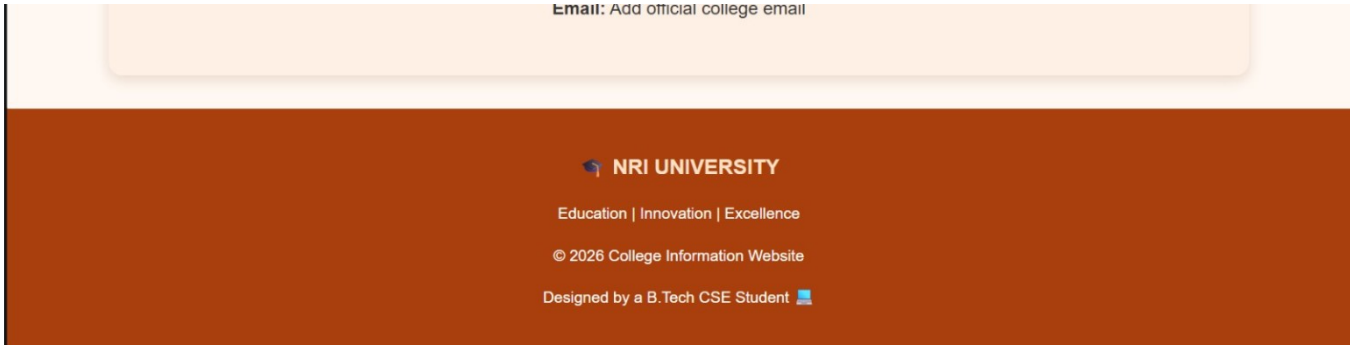

The facilities section displays the library, computer labs, sports, and transport. These cards make campus services easy to scan.

Screenshot 6: College Events and Contact Us

The events section highlights cultural, technical, and sports activities. The contact section gives the college name and location information.

Screenshot 7: Footer

The footer displays NRI University, the tagline “Education | Innovation | Excellence,” the copyright line, and a design credit.

ACTIVITY 2: STUDENT ACADEMIC DASHBOARD

Objective

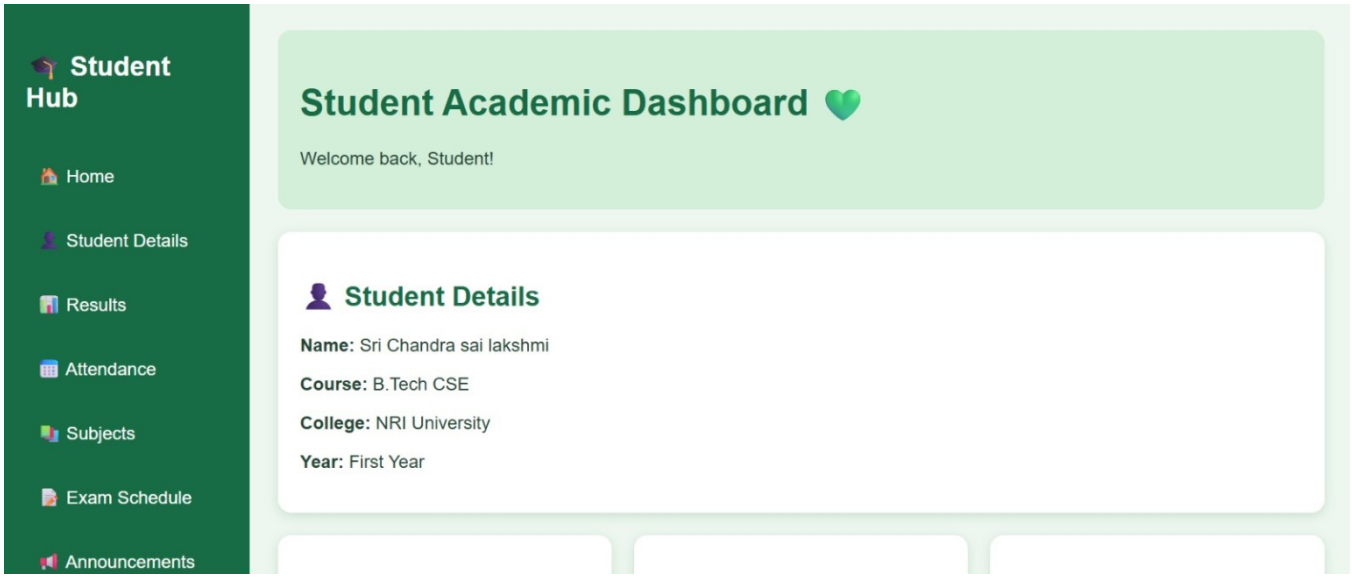

To design a student dashboard that brings academic information together in one place, allowing a student to review profile details, attendance, semester performance, subjects, examination dates, and announcements.

Explanation

The dashboard uses a green-and-white theme with a left-side navigation menu. Student Details displays the student name, course, college, and year. Summary cards show semester performance, overall attendance, and the number of subjects. Subject Attendance uses progress bars to compare attendance percentages. The Semester Results table lists subjects, marks, and grades. Subject Information lists the courses offered in the semester. The Examination Schedule table shows dates, subjects, and exam types, while Announcements provides reminders about exam timetables, assignment deadlines, and preparation. A footer completes the dashboard.

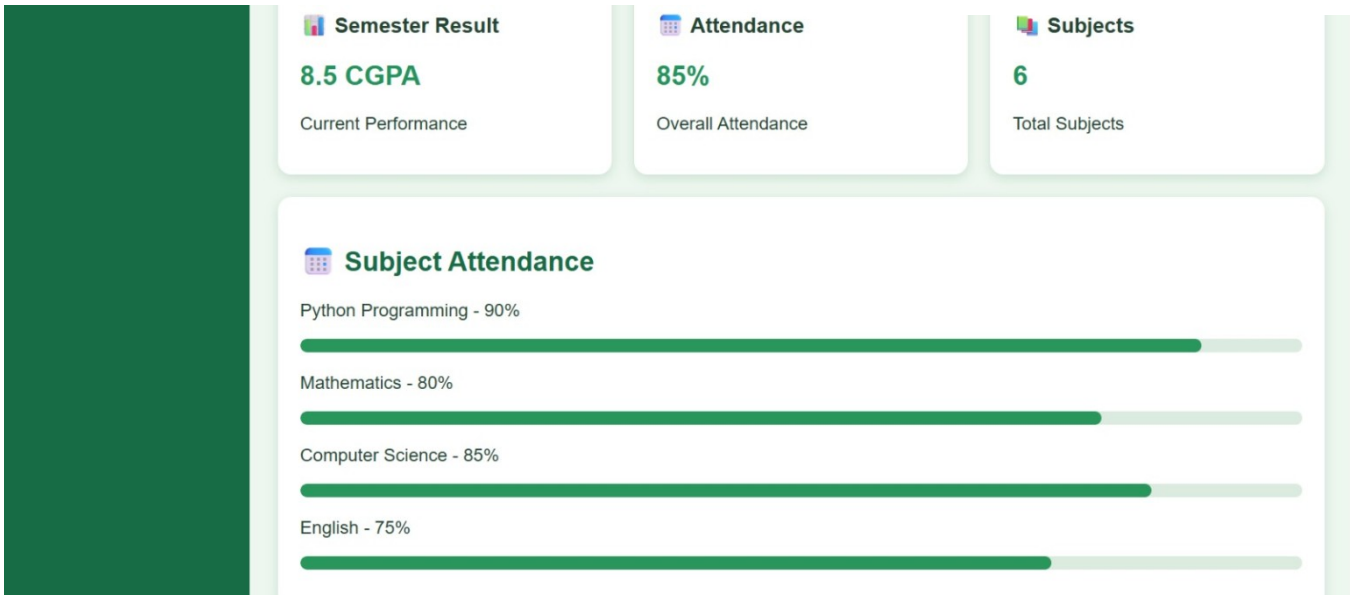

Screenshots and section-wise explanation

Screenshot 1: Student Academic Dashboard and Student Details

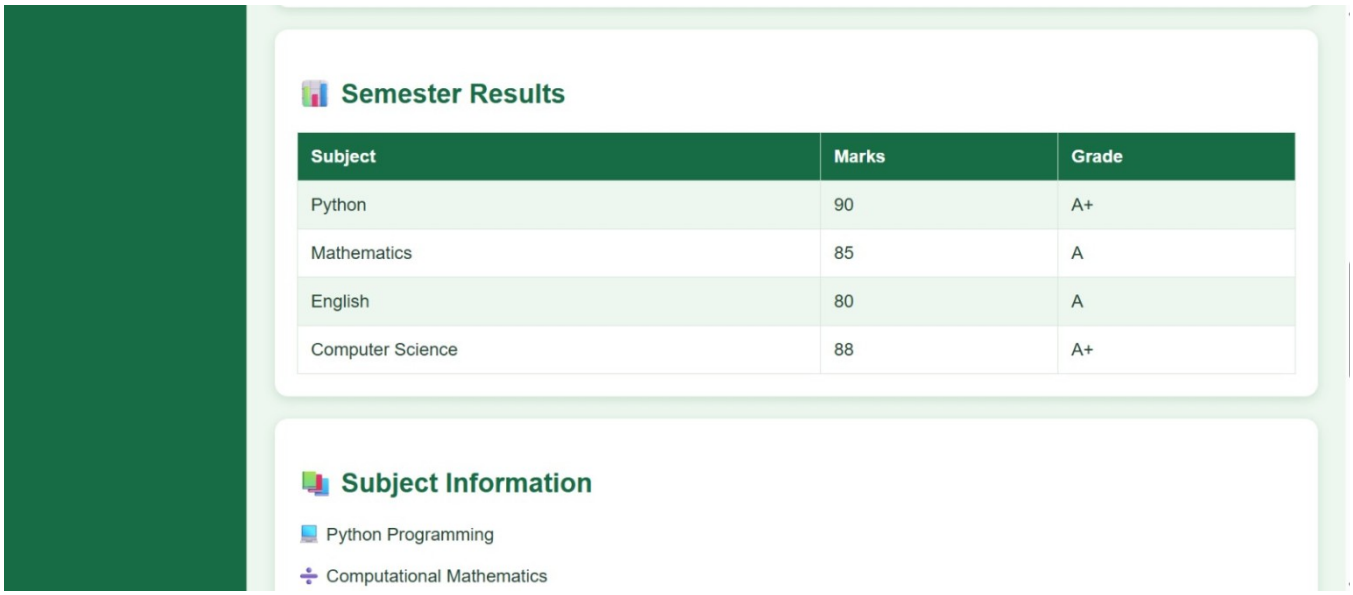

The left navigation menu provides links to Home, Student Details, Results, Attendance, Subjects, Exam Schedule, and Announcements. The main panel welcomes the student and shows profile information including name, course, college, and year.

Screenshot 2: Semester Result, Attendance, and Subjects

Summary cards show a sample CGPA, overall attendance, and total subjects. Progress bars display subject-wise attendance percentages, making it easy to compare attendance at a glance.

Screenshot 3: Semester Results and Subject Information

Semester Results

Subject	Marks	Grade
Python	90	A+
Mathematics	85	A
English	80	A
Computer Science	88	A+

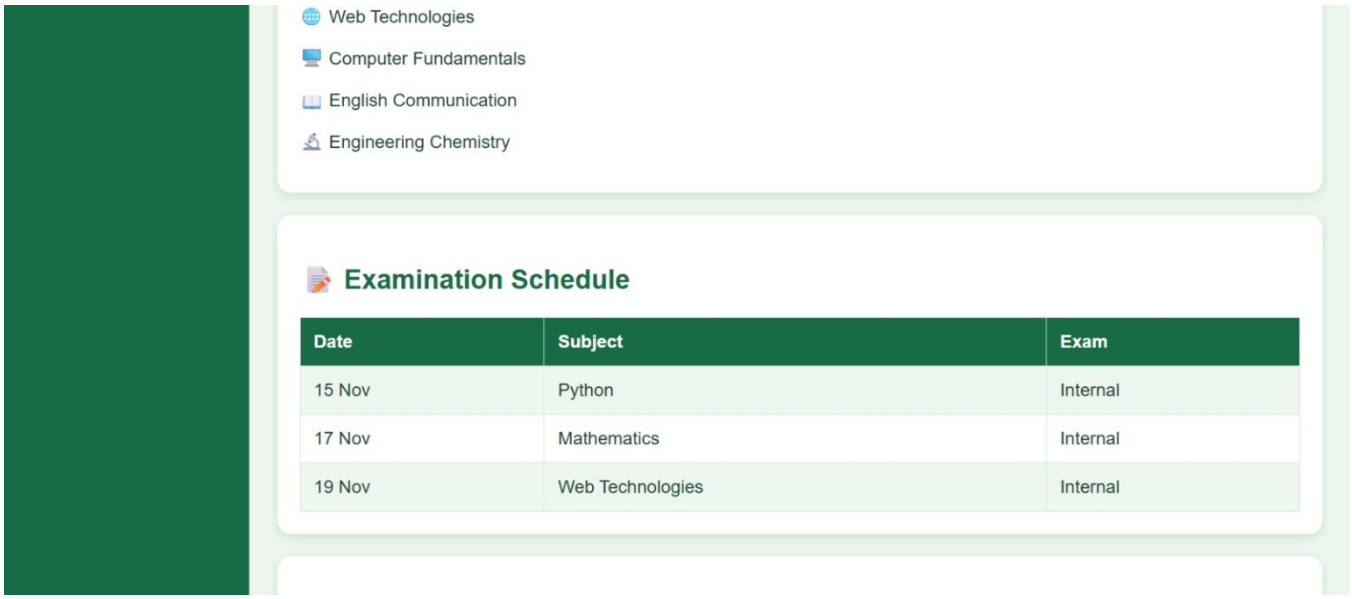

Subject Information

Python Programming

Computational Mathematics

The results table presents subject names, marks, and grades in rows and columns. The Subject Information section lists the academic subjects, such as Python Programming, Computational Mathematics, Web Technologies, Computer Fundamentals, English Communication, and Engineering Chemistry.

Screenshot 4: Examination Schedule

Web Technologies

Computer Fundamentals

English Communication

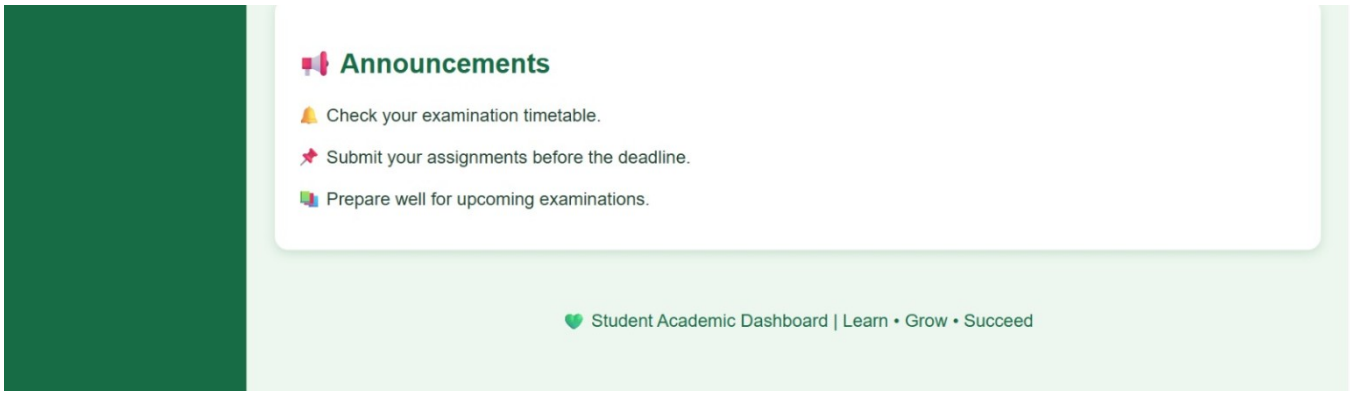

Engineering Chemistry

Examination Schedule

Date	Subject	Exam
15 Nov	Python	Internal
17 Nov	Mathematics	Internal
19 Nov	Web Technologies	Internal

The examination table organizes each exam by date, subject, and exam type. This makes upcoming internal assessments easier to review.

Screenshot 5: Announcements and Footer

The announcements section provides reminders to check the timetable, submit assignments before deadlines, and prepare for examinations. The footer summarizes the dashboard’s learning-focused theme.

ACTIVITY 3: DREAM HOMES

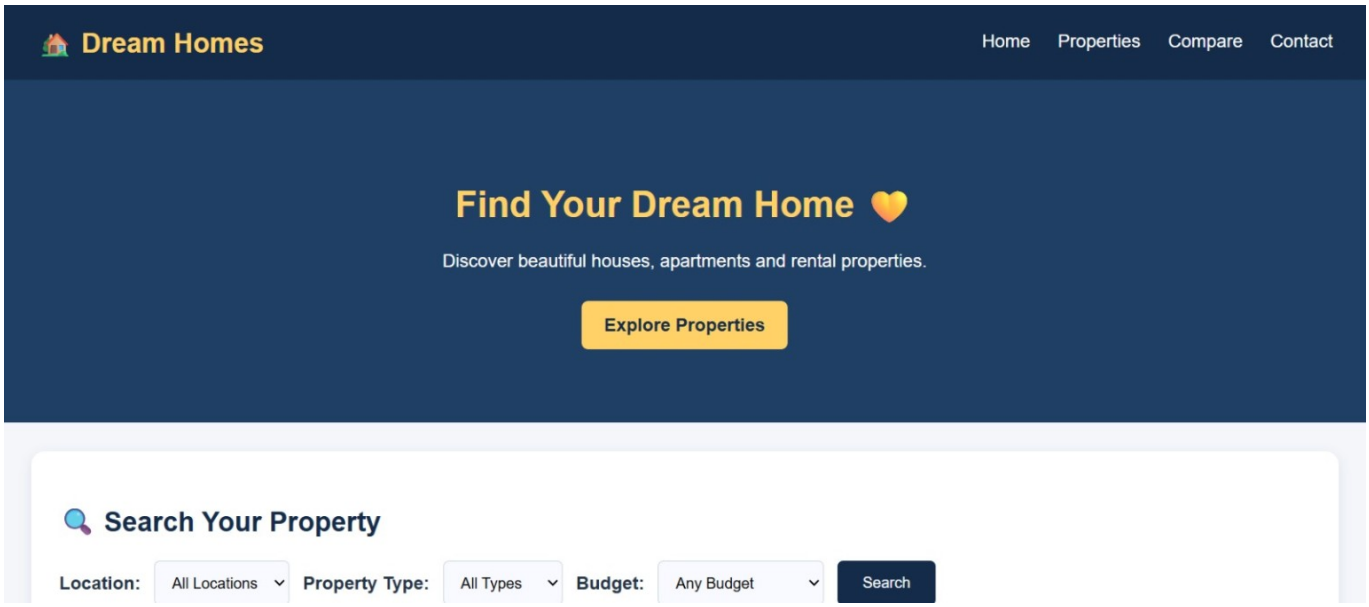

Objective

To design a real-estate website that helps users explore, search, and compare houses, apartments, villas, and rental properties in one place.

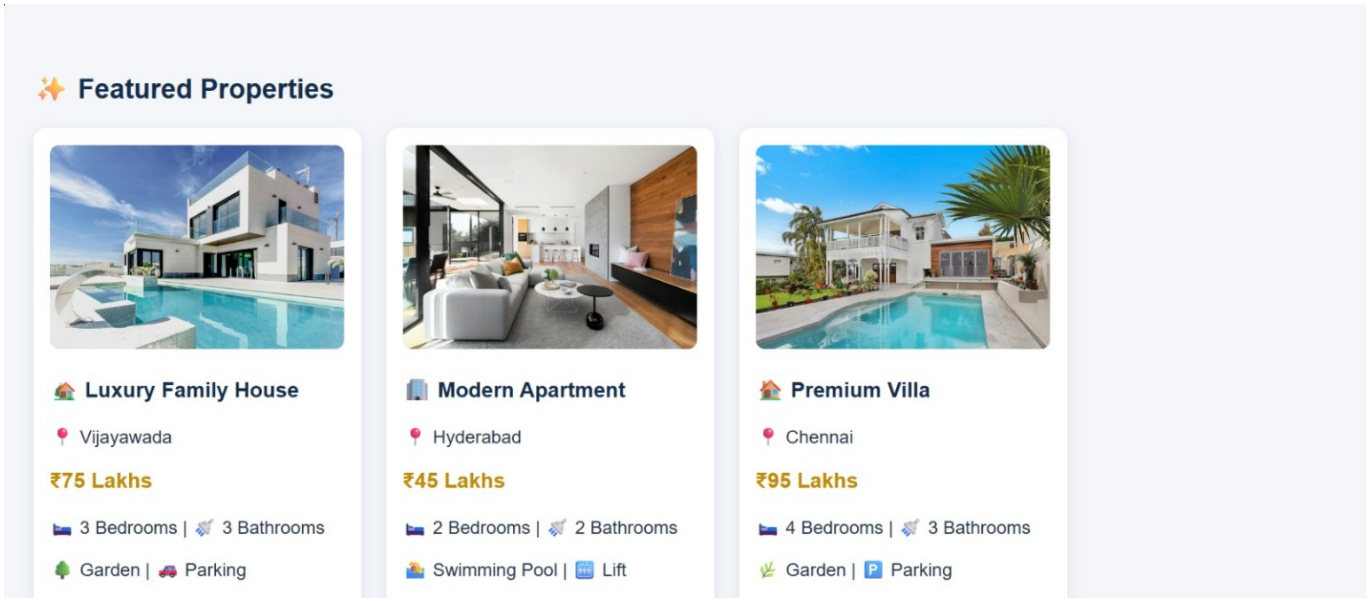

Explanation

Dream Homes uses a dark-blue and yellow colour theme. The navigation bar contains Home, Properties, Compare, and Contact links. The welcome section introduces the website and includes an “Explore Properties” button. Below it, the property search form allows users to select a location, property type, and budget before searching.

Screenshot 1: Homepage and Property Search

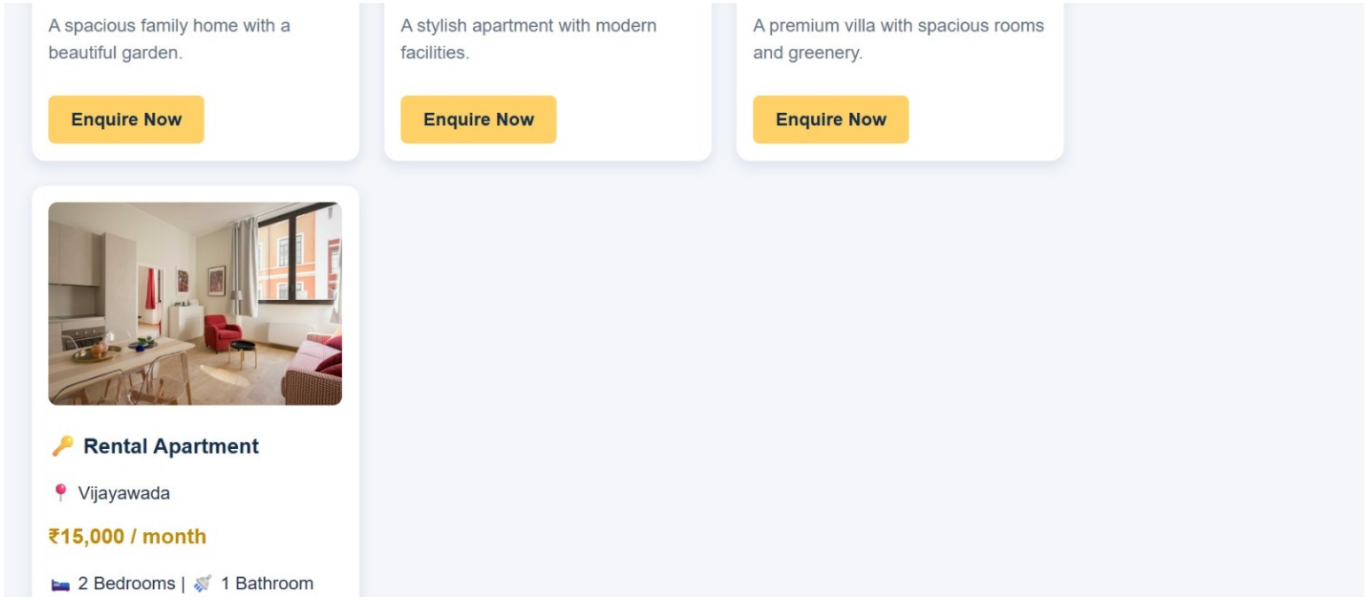

The first screenshot shows the website header, welcome message, Explore Properties button, and search filters for finding a suitable property.

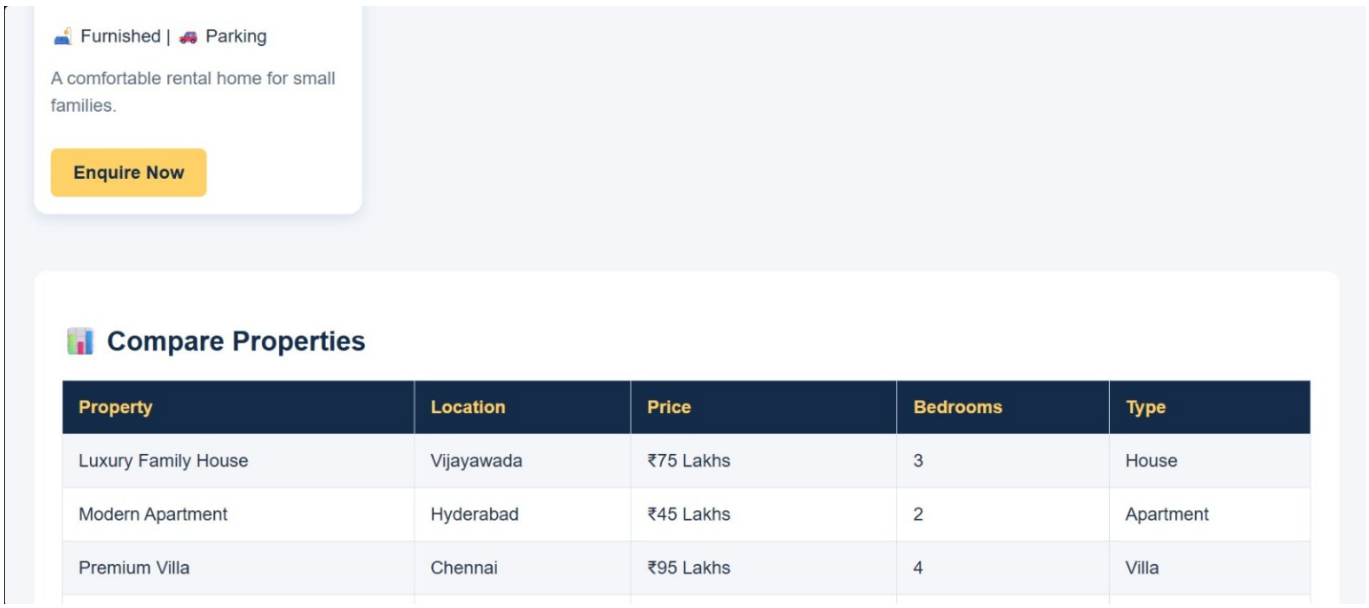

This section displays featured properties as separate cards. Each card includes a property image, name, location, price, number of bedrooms and bathrooms, facilities, a short description, and an Enquire Now button. The cards help users review the available options quickly.

Screenshot 3: Rental Apartment Details

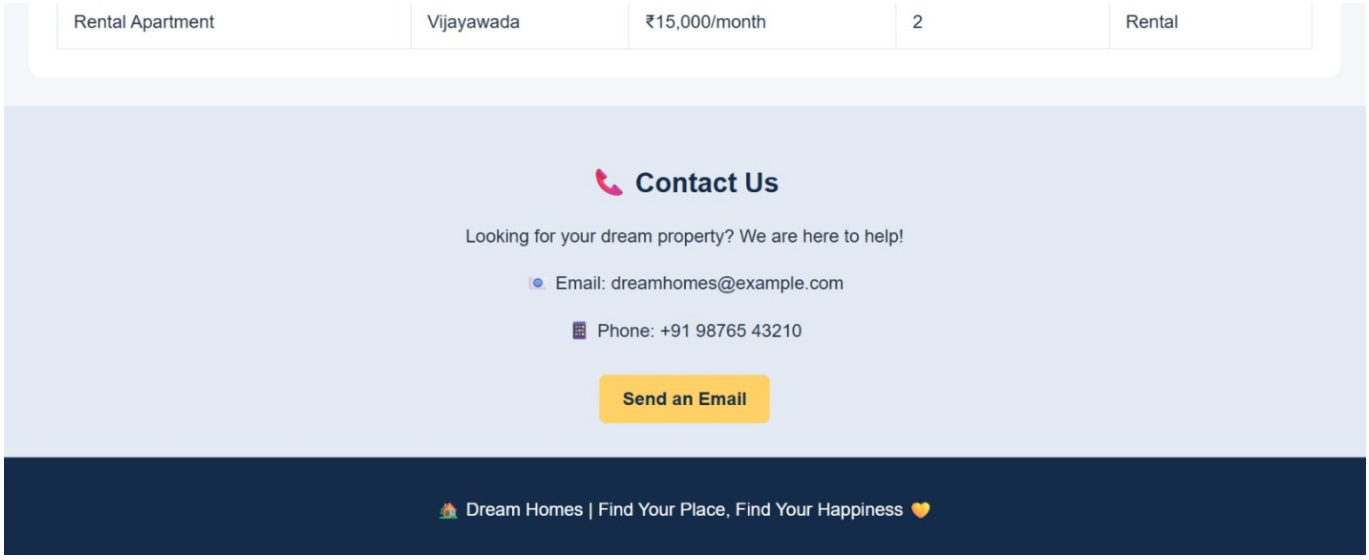

The rental apartment card presents the monthly rent, location, bedroom and bathroom count, furnishing status, parking facility, and a short description. This information is useful for people looking for a rental home.

The comparison table organizes property details into columns such as Property, Location, Price, Bedrooms, and Type. Users can compare the listed homes side by side and understand the differences before making a choice.

Screenshot 5: Contact Us and Footer

The Contact Us section provides an email address, phone number, and Send an Email button for enquiries. The footer displays the Dream Homes name and tagline, completing the webpage.

Conclusion

This report documents three web development activities: the NRI University website, the Student Academic Dashboard, and the Dream Homes real-estate website. Activity 1 presents college information and facilities, Activity 2 organizes student academic details, and Activity 3 helps users search, view, compare, and enquire about properties.

Learning Outcomes

• Understood how navigation menus organize different website sections.
• Learned how cards and images present information clearly.
• Observed how tables help users compare information.
• Practised explaining website screenshots and their functions.
• Understood the importance of consistent colours, spacing, and readable headings.
